Amir Rapaport
The new world is based on virtual borders, when many alliances are built on mutual interest in data protection for private sector eg. banks, but above all for countries.

Krystian Mika
We are here in Nairobi at Tems Africa ICT Expo. You are more than welcome to join us and discuss about what we can do to improve your cybersecurity levels.

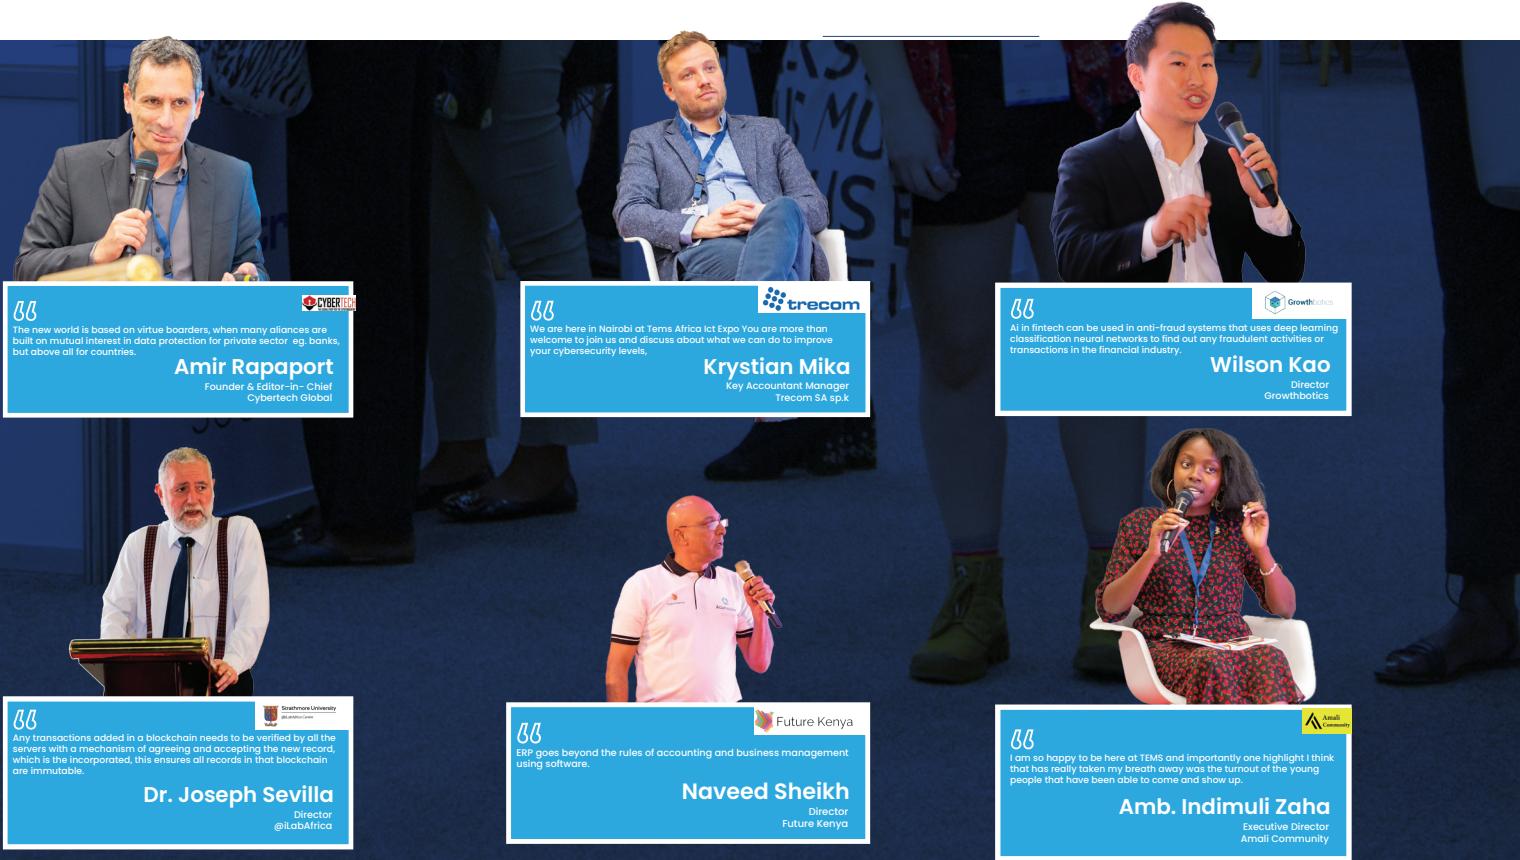

Wilson Kao
AI in fintech can be used in anti-fraud systems that use deep learning classification neural networks to find out any fraudulent activities or transactions in the financial industry.

Dr. Joseph Sevilla
Any transactions added in a blockchain needs to be verified by all the servers with a mechanism of agreeing and accepting the new record, which is the incorporated, this ensures all records in that blockchain are immutable.

Naveed Sheikh
ERP goes beyond the rules of accounting and business management using software.

Amb. Indimini Zaha
I am so happy to be here at TEMS and importantly one highlight that has really taken my breath away was the turnout of the young people that have been able to come and show up.
